

prairie process

1

ASSESSMENT
We assess your
site's conditions
and make a plan.

2

KILL VEGETATION
We remove all current
vegetation over 3 months.

3

INSTALLATION
We sow seeds and
install erosion control.

4

**1ST GROWING
SEASON**
We keep everything
cut low. The space will
look green but will not
have flowers.

5

2ND GROWING SEASON
We cut frequently for one
more growing season. It
will be green but without
flowers.

6

**3RD GROWING
SEASON**
Most prairies are
established by now.
You'll see lots of life
and beauty!

7

BEYOND
Your prairie will need
occasional maintenance
and an annual cut. You can
hire us to perform this work.
